Guest hosted by the ERC EarlyModernCosmology GA 725883 in collaboration with the FARE EarlyGeoPraxis project ID R184WN-STWH and the Centro di Teoria Critica e Politica (Center for Critical Theory and Politics)

A Reassessment of Marcuse's Perspective on Science, Technology and Society

Prof. Andrew Feenberg
School of Communication -
Simon Fraser University, Vancouver

Andrew Feenberg is a leading scholar in the fields of Critical Theory and Science and Technology Studies. In several publications (like *Critical Theory of Technology*, or *Between Reason and Experience: Essays in Technology and Modernity*) he has proposed to reassess concepts and approaches stemming from the Frankfurt School tradition and its backgrounds for studies in science, technology and society. In the Venice meeting he will present his views on this entanglement with a specific focus on Herbert Marcuse.
